Subject index

Volume 74 (2005)

Access; System analysis, methods; Hospital information systems; Process assessment; Health care quality; Evaluation **74**, 335

Acquired immune deficiency syndrome; Human Immunodeficiency Virus (HIV); Electronic medical records; International health; Resource poor; Sub-Saharan Africa; Developing countries; Medical record system, computerized **74**, 345

Adoption; Handheld; Personal digital assistant; Mobile computing **74**, 409

Adverse drug events; Computerized drug order entry; Prescription; Prescription errors **74**, 377

Adverse drug reaction reporting systems; Terminology; Automatic data processing; Knowledge representation (computer); Description logic; Ontological modeling **74**, 563

Algorithms; Natural language processing; Language; France; Controlled vocabulary; Funding; Non-US government **74**, 119

Anaesthesiology; Assessment method; Evaluation; Usability engineering; Quality management; Clinical Information System **74**, 179

Archetypes; Electronic health records; Information models; Paradigm shift; Middleware **74**, 213

Archetypes; PropeR EHR system; PropeRWeb; PIDS; COAS; Stroke patients; Primary care; Multidisciplinary **74**, 235

Artificial intelligence; Gene expression microarray analysis; Decision support systems; Neoplasms; Diagnosis; Computer-assisted **74**, 491

Artificial intelligence; Kidney; Influenza; Forecast; Prognosis; Case-based reasoning **74**, 307

Assessment method; Evaluation; Usability engineering; Quality management; Clinical Information System; Anaesthesiology **74**, 179

Asynchronous communication; Computer-supported cooperative work (CSCW); Modern health care **74**, 797

Attitude to computers; Hospital information systems; User-computer interface; Physician order entry **74**, 623

Attitudes to computers; Surveys; Computerized patient records **74**, 657

Automatic data processing; Adverse drug reaction reporting systems; Terminology; Knowledge representation (computer); Description logic; Ontological modeling **74**, 563

Automatic data processing; Hospital information systems; Medical informatics applications; Computer communication networks; Computer security; Software design; Medical record linkage; Medical records systems **74**, 245

Automatic indexing; Teaching materials; Educational technology; Terminology; MeSH **74**, 201

Best practices; Nursing knowledge; Evidence-based practices; Data infrastructure; Meta analysis; Levels of evidence; Quality; Effectiveness **74**, 989

Bioinformatics; Data mining; Clustering; Temporal Abstractions; Gene expression analysis **74**, 505

Budgeting; Dutch hospitals; DRG/DBC; Nursing minimum data set; Registration of care; Diversity; Variations; Homogeneity; Heterogeneity **74**, 926

Burns; Patient education; Personalization; Electronic patient record; Internet; Consumer health informatics **74**, 151

Cardiac-surgery; Nursing records; Nursing process; Nursing documentation; Nursing outcome; ICNP; Outcomes research **74**, 952

Cardiovascular risk; Risk calculation; Economic evaluation; Simulation model **74**, 191

Case-based reasoning; Kidney; Influenza; Forecast; Prognosis; Artificial intelligence **74**, 307

Classification; Collaboration; Professional practice; Delivery of health care **74**, 973

Classification; Perioperative nursing; Documentation; Delphi-technique **74**, 461

Clinical cognition; Nursing; Decision-making; Patient safety; Informatics **74**, 869

doi:10.1016/S1386-5056(05)00205-4

Clinical decision support; Electronic medical records; Computerized patient records; Electronic health records **74**, 917

Clinical decision support system; Clinical practice guidelines; Knowledge representation **74**, 597

Clinical decision support systems; Clinical protocols; Socio-technical approaches; Design; Workflow; Hematology; Oncology **74**, 101

Clinical decision support systems; Usage analysis; Qualitative research; Evaluation studies **74**, 535

Clinical documentation; Computerized patient record; Electronic health record; Nursing documentation; Problem-oriented medical record **74**, 395

Clinical informatics; Information retrieval; Evidence-based medicine; Family practice; Evaluation studies; Internet **74**, 1

Clinical Information System; Assessment method; Evaluation; Usability engineering; Quality management; Anaesthesiology **74**, 179

Clinical; Intensive care unit; Critical care; Information system; Information management; Integration **74**, 643

Clinical practice guidelines; Clinical decision support system; Knowledge representation **74**, 597

Clinical practice guidelines; Decision support systems; Decision rules; Knowledge modeling; GEM **74**, 79

Clinical Practice; Health Information Systems; Guideline; Decision Support System; Guideline Management System; Workflow Management System **74**, 553

Clinical protocols; Clinical decision support systems; Socio-technical approaches; Design; Workflow; Hematology; Oncology **74**, 101

Clinical simulation; Problem based learning; eLearning **74**, 527

Clustering; Bioinformatics; Data mining; Temporal Abstractions; Gene expression analysis **74**, 505

CMS; FLOSS; OSNI **74**, 937

COAS; PropeR EHR system; PropeRWeb; Archetypes; PIDS; Stroke patients; Primary care; Multidisciplinary **74**, 235

Cognitive activity analysis; Computerized physician order entry (CPOE); Synchronous and asynchronous cooperation; Medication errors **74**, 629

Collaboration; Classification; Professional practice; Delivery of health care **74**, 973

Commitment; Project management; Participation; Evaluation **74**, 1000

Communication; Medical informatics; Home care; Coordination **74**, 809

Communication observation method; Interruptive communication; Intensive care unit **74**, 791

Communication process; Team conferences; Theory; Information and communication technology (ICT); Rehabilitation; Measurement instrument **74**, 783

Communication; Telemedicine; Dermatology; Interpersonal relations **74**, 851

Complementary therapies; Internet; Information services; Information storage and retrieval **74**, 685

Computational modeling; Nursing informatics; Safety; Quality; Errors; Nursing **74**, 605

Computer communication networks; E-mail; Family physicians; Internists; Patient-provider communication; Primary care **74**, 21

Computer communication networks; Head and neck cancer; Continuity of patient care; Social support; Telemedicine **74**, 839

Computer communication networks; Hospital information systems; Automatic data processing; Medical informatics applications; Computer security; Software design; Medical record linkage; Medical records systems **74**, 245

Computer communication networks; Information systems; Information storage and retrieval; Databases; Databanks **74**, 133

Computer; Computerized; Informatics; Primary care; Reminders; Decision-support **74**, 357

Computer security; Hospital information systems; Automatic data processing; Medical informatics applications; Computer communication networks; Software design; Medical record linkage; Medical records systems **74**, 245

Computer use; GP-patient interaction; Health informatics; Conversation analysis; Video analysis; Ethnomethodology **74**, 425

Computer-assisted; Gene expression microarray analysis; Decision support systems; Neoplasms; Diagnosis; Artificial intelligence **74**, 491

Computerised practice guidelines; Information-retrieval; Databases; Electronic resources; Information services; Information systems **74**, 745

Computerized; Computer; Informatics; Primary care; Reminders; Decision-support **74**, 357

Computerized drug order entry; Prescription; Prescription errors; Adverse drug events **74**, 377

Computerized; Evaluation studies; Medical records; Data quality; Information storage and retrieval; Neurology **74**, 387

Computerized; Information systems; Primary health care; Medical records systems; Data collection; Quality assurance; Health care; Prescriptions; Drug **74**, 367

Computerized medical record systems; Implementation; Evaluation; Strategy **74**, 229
